ABOUT VIADUCT LTD

Viaduct Limited is New Zealand's leading independent EFTPOS supplier. Viaduct's vision is to provide small business owners with real flexibility to select how they connect and transact with their customers for both EFTPOS and Point of Sale.

For small business owners, Viaduct is a **trusted partner** whose goal is to provide the most effective payments solution in the NZ market.

Viaduct has become the leading NZ EFTPOS dealer, by understanding and focussing on the Customer. They have removed the need for finance companies to be involved, and built hardware flexibility into the Networkz offering.

Viaduct is **WESTPAC's, HANZ & NZRA's** preferred Supplier for EFTPOS.

CHANGES TO BILLING

Viaduct Limited has a direct billing & debit relationship with their Customers, vs Networkz previous method of payment 20th month, following supply of products and services.

Equipment and consumables are usually now purchased via a DIRECT DEBIT facility.

This means that **ALL EXISTING ACCOUNT CUSTOMERS WILL NEED TO MIGRATE TO DIRECT DEBIT**, to have a flexible payment method with Networkz moving into the future.

- ✓ **DIRECT DEBIT** – Fill out the Viaduct direct debit form supplied or download from www.networkz.co.nz

This is the primary payment method and will allow greater flexibility for paying for Networkz products & services including EFTPOS, service and consumables.

OTHER METHODS OF PAYMENT

These however will not provide the same level of flexibility as Direct Debit. Viaduct can take payment and

- ✓ **CREDIT CARD** – Provide Credit card details to purchase before supply of products and/or service.
- ✓ **CHEQUE** – *Before* supply of products and/or service.

DISCLOSURE OF DEBIT AMOUNT

Viaduct Limited will send an invoice via email or fax, with the items listed, and total amount subject to debit, when using the direct debit method of payment.

If you rent EFTPOS, any additional purchases or services will be debited along with the usual EFTPOS rental amount, on a monthly basis. You may still purchase larger products or service, negotiating the method and timing of payment.

POS System purchase or Lease

If you wish to purchase to own a Cash register or larger POS system for example, Networkz will either require this to be –

1. Financed over a term, using the **direct debit method**, or
2. Paid by direct debit, a Cheque or Credit Card deposit on order, and the balance paid generally on installation or as agreed.

The Direct Debit method is –

1. Simple to use,
2. Transparent via invoice,
3. Trusted to be accurate,
4. Flexible. To allow changing Bank mandates & individual Retailer circumstances to continue to be met over time, unlike many other EFTPOS & POS suppliers.
